2003 Ford Expedition Engine Sputters

The 2003 Ford Expedition has 7 problems reported for engine sputters. Average repair cost is \$370 at 85,000 miles. CarComplaints.com : Car complaints, car problems and defect information

2003 Ford Expedition Engine Sputters: 7 Complaints

If your Ford Expedition has a sputter, it is most likely going to be caused by bad fuel system, ignition system, MAF sensor, or bad catalytic converter. Your Expedition 's engine is a giant pump. It pulls in air (where it is measured by the mass airflow sensor). The air is then guided into the cylinder where fuel is added and compressed.

Here are the most common symptoms of a bad fuel filter in your Ford Expedition : Sputtering Under Load. The only way that you are going to know that your Expedition 's fuel filter may be going out is that it is no longer letting enough fuel through to keep the engine running under a heavy load, or at high-speed.

Ford Expedition : Bad Fuel Filter → Symptoms and Diagnosis ...

Your 2003 Ford Expedition exhaust system runs from the exhaust manifold (or header) flange connected to the engine, all the way to the exhaust tip at the rear. In between you will usually find a flex pipe, catalytic converter or two, a mid pipe, a resonator, a muffler, and several feet of carefully routed exhaust pipe tube.

Engine Shudders and Sputters When Trying to Accelerate ...

A sputtering (misfiring) engine indicates insufficient fuel/too much air In the situation described, this sounds like an issue pertaining to low fuel pressure since the car doesn't suffer as much when the fuel tank is full (higher in-tank fuel pressure). The following culprits spring to mind: a clogged fuel filter
