If your Mazda AC is not working, it could be this simple problem!

Mazda AC easy fix! - YouTube

The Mazda 3's A/C compressor starts the A/C system refrigeration cycle by converting refrigerant into a high pressure, high temperature gas that is sent to the A/C condenser. The A/C compressor is driven by an engine belt and activated by the A/C clutch, which bypasses the power of the belt to the compressor when the A/C is not activated.

A/C Compressor - 2008 Mazda 3 | O'Reilly Auto Parts

While there are a variety of reasons your Mazda 3 air conditioning won't work, the most common 3 are a refrigerant leak, an electrical climate control issue, or a problem with the air conditioning compressor.

Mazda 3 AC Is Not Working - repairpal.com

Also could be your ac compressor. They have ac compressor lubrication in a can just like the freon. You can notice the extra strain the ac puts on the engine when you turn it on and especially at idle. So 1. Make sure belts are tight and in good condition, if not replace. 2. Check freon level in ac. If freon level is okay add ac oil conditioner.

How to check the AC- freon level on a Mazda 3 2008 - Fixya

For an AC system to work, it needs a gas or liquid substance called refrigerant (R-12 in older cars, R-134a in 1995 and newer cars). Over time, refrigerant can leak from the AC system through seals. If the AC does not have enough refrigerant, it will
