CiteSeerX - Document Details (Isaac councill, Lee Giles, Pradeep Teregowda): Bovine papillomavirus (BPV) induces papillomas in cattle; in the great majority of cases, these regress due to the host immune response, but they can persist and progress to malignancy. Even in the absence of malignant transformation, BPV infection persists for a significant period of time before activation of the ...

Abstract. The major histocompatibility complex (MHC) class I region in mammals contains both classical and non-classical MHC class I genes. Classical MHC class I molecules present antigenic peptides to cytotoxic T lymphocytes, whereas non-classical MHC class I molecules have a variety of functions.

The E5 oncoprotein of BPV-4 does not interfere with the ...

Determine how heparanase, a master regulator of cancer metastasis, affects the onset of brain metastasis via enzymatic and non - enzymatic functions, and at multiple levels, e.g., tumor cell adhesion, vascular cooption, disruption of the blood-brain-barrier, cytoskeletal dynamics, tumor cell extravasation/growth, and promoting chemotherapy resistance.
