The Boeing 757 comes in two variants, the 200 and the 300. The 300 is the stretched version of the 200. An easy way to tell the difference is that the 300 has two emergency-exit doors over the wings and the 200 has none. Between the 767 and the 757, the 757 has a pointier nose. The 767 is a touch more bulbous.

in. 44.42 m. 145 ft 9 in. wingspan.

## **Boeing 707-320B vs. Boeing 757-200**

The twin-engine, medium-range 757 was up to 80 percent more fuel efficient than the older 727 jetliners it was designed to replace but retained the 727's short-field capability. The 757-200 carried up to 228 passengers and had a range of approximately 3,900 nautical miles (7222 kilometers). The 757 and the 767 were developed concurrently, so both shared the same technological advances in propulsion, aerodynamics, avionics and materials.
