Business Data Communications: Infrastructure, Networking and Security covers the fundamentals of data communications, networking, distributed applications, and network management and security. These concepts are presented in a way that relates specifically to the business environment and the concerns of business management and staff.

Business Data Communications- Infrastructure, Networking ...

Communications infrastructure is best understood as the technology, products and network connections that allow for the transmission of communications over large distances. From single-purpose networks, to the advent of converged, multi-purpose networks, the category is continually evolving. As new infrastructure capabilities emerge, they enable the use of cutting-edge technologies to power business innovation.

Communications Infrastructure is the Future of Your Business

Server Rooms / Data Center. The server room, or data center (in large organizations), can be thought of as the central core of your network. It is the location in which you place all of your servers, and it usually acts as the center of most networks. Infrastructure Software. This is perhaps the most "gray" of all infrastructure components.

IT Infrastructure: Hardware and Software

A data infrastructure is a collection of data assets, the bodies that maintain them and guides that explain how to use the collected data. A data infrastructure is the proper amalgamation of organization, technology and processes. Privacy of data is an important aspect, and thus the data assets in a data infrastructure could either be in the open part or in the shared form. Data can create maximum value if it has an open data infrastructure.

What is a Data Infrastructure? - Definition from Techopedia

As it applies to your business, it refers to the combined suite of hardware, software, and network resources required to operate an enterprise information technology environment. It is the backbone that allows the delivery of business value through IT applications and solutions to employees, stakeholders and customers/clients.
