Tutorials - C++ Tutorials

Description. In the C Programming Language, you can place comments in your source code that are not executed as part of the program. Comments provide clarity to the C source code allowing others to better understand what the code was intended to accomplish and greatly helping in debugging the code. Comments are especially important in large projects containing hundreds or thousands of lines of source code or in projects in which many contributors are working on the source code.

C Language: Comments

When using an object oriented programming language, such as C++, programmers often create their own classes and then declare objects of these class types. These programs are frequently composed of several files - one or more header files containing class definitions, implementation files containing class functions, and a file containing the ...

C++ Program Documentation Guidelines

A C file is a source code file for a C or C++ program. It may include an entire program's source code, or may be one of many source files referenced within a programming project. C files can be edited using a basic text editor, but will not show syntax highlighting like most software development programs do.
