## Celestial Maps

Constellation Map. Constellation maps divide the celestial sphere into 88 parts, known as constellations, helping astronomers locate stars and deep sky objects. The star constellations that can be seen in the night sky depend on the observer's location and season, and they change throughout the year. Out of the 88 constellations recognized by the International Astronomical Union (IAU), 36 are found predominantly in the northern sky, while the remaining 52 are located in the southern sky.
