Chapter 10. Number Theory and Cryptography. 454. The Greatest Common Divisor (GCD) The greatest common divisor of positive integers a and b , denoted $\gcd(a, b)$, is the largest integer that divides both a and b . Alternatively, we could say that $\gcd(a, b)$ is the number c , such that if $d|a$ and $d|b$, then $d|c$. Chapter 10 Number Theory and Cryptography - MAFIADOC.COM

"Number Theory" is more than a comprehensive treatment of the subject. It is an introduction to topics in higher level mathematics, and unique in its scope; topics from analysis, modern algebra, and discrete mathematics are all included. The book is divided into two parts.

Number Theory | SpringerLink

This chapter on number theory is truly elementary, although its problems are far from easy. (In fact, here, as elsewhere in the book, we tried to follow Felix Klein's advice: "Don't ever be absolutely boring.") We avoided the intricacies of algebraic number theory, and restricted ourselves to some basic facts about residue classes and ...

Number Theory | SpringerLink
