Charles Babbage, pioneer of the computer : Hyman, Anthony ...

English mathematician and inventor Charles Babbage is credited with having conceived the first automatic digital computer. During the mid-1830s Babbage developed plans for the Analytical Engine. Although it was never completed, the Analytical Engine would have had most of the basic elements of the present-day computer.

Charles Babbage | Biography & Facts | Britannica

The modern computer was born out of the urgent necessity after the Second World War to face the challenge of Nazism through innovation. But the first iteration of the computer as we now understand it came much earlier when, in the 1830s, an inventor named Charles Babbage designed a device called the Analytical Engine.

The First Computer: Charles Babbage's Analytical Engine

Charles Babbage. Charles Babbage (1792 — 1871) is known as the patron saint of operations research and management science. Babbage's scientific inventions included a mechanical calculator (his “ difference engine ”), a versatile computer (his “ analytical engine ”), and a punch-card machine. His projects never became a commercial reality; however, Babbage is considered the originator of the concepts behind the present day computer.

Pioneers of Management | Encyclopedia.com

26 December 1791 - 18 October 1871 Mathematician & Pioneer of the Modern Computer Known as one of the great mathematicians, Charles Babbage pioneered the digital age. He is credited with creating the concept for the first programmable computer, the Difference Engine, which was built in the early 20th Century.
