Data communication and terminal equipment 1.7. Data Representation Data representation is defined as the methods used to represent information in computers.

(PDF) DATA COMMUNICATION & NETWORKING - ResearchGate

A computer network is basically a set or group of a computer system and other related hardware devices which are interrelated through different communication channels to implement proper communication procedures and related networking methodologies whereas data communication is basically a transmission process that includes digital data transfers between two or more computers or similar devices and vice versa.

Computer Network vs Data Communication | Top 7 Valuable ...

Terminology. In the seven-layer OSI model of computer networking, packet strictly refers to a protocol data unit at layer 3, the network layer. [citation needed] A data unit at layer 2, the data link layer, is a frame. In layer 4, the transport layer, the data units are segments and datagrams. Thus, in the example of TCP/IP communication over Ethernet, a TCP segment is carried in one or more IP ...
