Describing Your Data Frequencies Cross Tabulations And

Frequencies / Cross-tabulation Program First, select the year(s) in which you are interested. Next, choose the variables you would like to analyze. To generate frequencies or cross tabulations, you can either type the variable names in the boxes pictured below, or use the variable dictionary on the left of the screen.

SDA Frequencies / Cross-tabulation Program

One of the most common ways to describe a single variable is with a frequency distribution. Depending on the particular variable, all of the data values may be represented, or you may group the values into categories first (e.g., with age, price, or temperature variables, it would usually not be sensible to determine the frequencies for each value.

Descriptive Statistics | Research Methods Knowledge Base

To describe a single categorical variable, we use frequency tables. To describe the relationship between two categorical variables, we use a special type of table called a cross-tabulation (or "crosstab" for short). In a cross-tabulation, the categories of one variable determine the rows of the

table, and the categories of the other variable determine the columns.

Crosstabs - SPSS Tutorials - LibGuides at Kent State ...

Cross tabulation is usually performed on categorical data — data that can be divided into mutually exclusive groups. An example of categorical data is the region of sales for a product. Typically, region can be divided into categories such as geographic area (North, South, Northeast, West, etc) or state (Andhra Pradesh, Rajasthan, Bihar, etc).
