### Dogs A New Understanding Of

"Dogs" teaches old dog lovers new tricks. For thousands of years after dogs stopped being wolves, and before they became pets, they were something else -- a self-domesticated species with a mind of their own. The Coppingers' convincing new theory of dog evolution will be as interesting for archaeologists as for breeders and pet owners.

## **Dogs: A Startling New Understanding of Canine Origin ...**

It proposes a new hypothesis about the origin of dogs, a more humble one than the one we're used to know: dogs come from dumps, from human ones. At the same time these canids were attracted to human waste, they became domesticated and used to human contact, by a matter of natural selection and adaptation to a new niche.

Instead their hypothesis is that dogs actually domesticated themselves, adapting to a new niche-scavenging at Neolithic rubbish heaps. According to *Dogs: A New Understanding*, this means that even though dogs and wolves share a common ancestor, dogs don't behave like wolves and shouldn't be treated like they do. It's very complicated.
