Chapter-16 Evolution of populations Flashcards | Quizlet

CHAPTER 16 EVOLUTION OF POPULATIONS A. Darwin's Ideas revisited - it was more than 50 years after Darwin started to develop his theory of evolution before biologists could determine how evolution takes place - about 1910, biologists realized that genes carry the information that determine traits

Chapter 16 Evolution Of Populations Section Review Answer Key

Chapter 16 Evolution of Populations 16-1 Genes and Variation Darwin's original ideas can now be understood in genetic terms. Beginning with variation, we now know that traits are controlled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozygous for many genes. To understand evolution, genetic varia-

Chapter 16 Evolution of Populations Summary

random change of allele frequencies in large populations: founder effect: gene frequencies change due to the migration of a small subgroup of the population: Hardy Weinberg Principle: allele frequencies will remain constant unless one or more factors cause a change ($p^2 + 2pq + q^2 = 1$) genetic equilibrium
