equipment in a typical industrial plant or facility.

Industrial Machinery Repair - 1st Edition

Best Maintenance Repair Practices A number of surveys conducted in industries throughout the United States have found that 70% of equipment failures are self-induced. Maintenance personnel who are not following what is termed 'Best Maintenance Repair Practices' substantially affect these failures.

Best Maintenance Repair Practices

Machines to be maintained include both heavy-duty industrial equipment and simple hand-operated machines. Maintenance of machinery is frequently handled reactively (e.g. after a breakdown) though it may also be done proactively, as with preventive and predictive maintenance. Preventive maintenance keeps assets in good repair through regularly scheduled service; predictive maintenance relies on equipment monitoring to detect problems before they result in a breakdown.
