Limnology (/ ˌ l ɪ m ' n ɒ l ə dʒ i / lim-NOL-ə-jee; from Greek λίμνη, limne, "lake" and λόγος, logos, "knowledge"), is the study of inland aquatic ecosystems. The study of limnology includes aspects of the biological, chemical, physical, and geological characteristics and functions of inland waters (running and standing waters, fresh and saline, natural and man-made).

**Limnology - Wikipedia**

Limnology is the study of surface waters that are located inland. Inland surface waters include lakes, ponds, springs, creeks, streams, rivers, estuaries and wetlands. Limnology encompasses both fresh and salty water bodies. Limnology, however, does not include groundwater for obvious reasons; groundwater is not on the surface!
