Firefox and the Linux command line - LinuxConfig.org

- [Instructor] The default interface for Linux is the command line. As we've learned, the graphical interface is a suite of applications that run on Linux, and are not necessary for Linux to function. The command line is often the fastest, most efficient way of getting work done. The advantages of the command line are as follows.

The Linux command line - LinkedIn Learning

We also should point out that while Windows and DOS use the well known back-slash ' \ ' in the full path address, Linux differentiates by using the forward-slash ' / '. This explains why we use the command ' cd /etc/init.d ' and not ' cd \etc\init.d ' as most Windows users would expect.

The Linux Command Line - Firewall.cx

The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell.
