IBM Maximo Visual Inspection makes computer vision with deep learning more accessible to business users. IBM Maximo Visual Inspection includes an intuitive toolset that empowers subject matter experts to label, train and deploy deep learning vision models, without coding or deep learning expertise.

Maximo Visual Inspection - Overview | IBM

The rest APIs describe the resource using JSON schema standards. Maximo metadata contains more information than JSON schema supports. Therefore, the schema specification is extended with Maximo specific properties that contains more information from the Maximo metadata. Schema's can be accessed in couple of ways using the REST APIs.

Overview - IBM Developer

Maximo maintains information about the controls used to compose an application's user interface in XML format, and stores this information in the database. Maximo assigns a unique ID to each control used in an application, and Application Designer accesses these controls by referencing their unique IDs.

Application Designer Quick Start Guide

Discover samples and documentation for integrating Node.js with Maximo Asset Management using the Node.js SDK and the REST APIs. The Node.js SDK is provided "as-is" and is Open Source. Developers are encouraged to use the SDK and participate in the Open Source community for support. View Node.js SDK on GitHub
