Multidimensional Expressions (MDX) Reference - SQL Server ...

Let us begin by acknowledging that MDX is a nontrivial topic. With SQL Server 2000 and Analysis Services, Microsoft is providing arguably the most powerful OLAP solution at perhaps the lowest price. But with power comes complexity. Much of this complexity is to be found in the OLAP query language: MDX.

Microsoft recommends that you send an MDX statement through an OPENROWSET or an OPENQUERY function, as shown in the earlier examples. This method lets SQL Server send the command directly to the linked OLAP provider, without trying to parse it. The command can be MDX or the subset of SQL that the OLAP provider supports.

How to perform a SQL Server distributed query with OLAP Server

In Multidimensional Expressions (MDX) statements, you can look for empty values and then perform certain calculations on cells with valid (that is, not empty) data. Eliminating empty values when performing calculations can be important because certain calculations, such as an average, can be inaccurate if empty cell values are included.

Working with Empty Values - SQL Server | Microsoft Docs

SQL Server 2012 and 2016 come with a free tool: SQL Server Data Tools (SSDT) for cube developers. Just as the Business Intelligence Development Studio (BIDS) was the tool that we used for cube design and MDX scripting in SSAS 2008, SSDT is the tool we will use in this cookbook for cube design and MDX scripting for SSAS 2016.
