Package Dse R

dse: Dynamic Systems Estimation (Time Series Package) Tools for multivariate, linear, time-invariant, time series models. This includes ARMA and state-space representations, and methods for converting between them. It also includes simulation methods and several estimation functions.

R

The package implements an R/S style object approach to time series modeling. This means that different model and data representations can be implemented with fairly simple extensions to the package. The package includes methods for simulating, estimating, and converting among different model representations. These are mainly in dse.
