Ada Lovelace - Wikipedia

Ada Lovelace discovered that a computer could follow a sequence of instructions—that is, a program. In her writings about Charles Babbage 's proposed computer, the Analytical Engine , she showed that the computer could follow a series of steps to make complex calculations, and she speculated that such programs could work with “other things besides number.”

Ada Lovelace | Biography & Facts | Britannica

Ada Lovelace Becomes the World's First Computer Programmer. London-born Ada Lovelace (1815–1852) had a passion and gift for mathematics from a young age. She is credited with being the world's first computer programmer, as she drafted plans for how a machine called the Analytical Engine could perform computations. The machine, invented by her friend, mathematician and inventor Charles Babbage, is considered to be the first general computer.
