## Document Set Limitations and Considerations in SharePoint ...

Published by Lance Cheng on June 7, 2012 | 1 Response. Boundaries, thresholds and supported limits. In SharePoint Server 2010, there are certain limits that are by design and cannot be exceeded, and other limits that are set to default values that may be changed by the farm administrator. There are also certain limits that are not represented by a configurable value, such as the number of site collections per Web application.

## **SharePoint Server 2010 Boundaries and Limits : BoostSolutions**

Document Sets were newly implemented in SharePoint 2010 and not without limitations so folder functionality could not be eliminated. The single limitation I found that most impacted our implementation of Document Sets was the inability to declare Document Sets as in-place records, meaning you can only declare them as records in a Records Center.

Document Sets let you create a collection of related documents, and have SharePoint treat them as one unit. For example, you might collect all the items that you need for a sale - a sales contract, a bill of materials, engineering specs, and so on - and store them as the Contoso sale Document Set.

## **Introduction to Document Sets - SharePoint**

In the New Document Set dialog box, type a name and description for the Document Set you are creating, and then click OK or Save. When the Document Set is created, the browser displays the Welcome Page for the Document Set. If this Document Set is configured to automatically create documents when you create a new instance of it, these documents appear in a Web Part on the Welcome Page.

## **Create and manage Document Sets - SharePoint**

In SharePoint 2010, there is a new feature called document sets which allows users to group different kind of documents under a single set. It also allows the defining of metadata, attributes and workflows on a document set. In this article, we will show you how to create and use document sets inside a document library.
